

Monroe County Civic Center

Owner:

Monroe County DES

Danforth's Role:

Energy Performance Contractor

Contract Value:

\$13,300,000

Date Completed:

April 2012

Danforth was awarded the mechanical contract for renovations to be done on the Monroe County Civic Center, located in downtown Rochester, NY. The main focus of the project was to upgrade the facility's controls systems.

Operating out of our Victor, NY office, Danforth was to upgrade the controls systems throughout the parking garage as well as the adjoining structures. The team upgraded the current carbon dioxide detectors. Additionally, Danforth removed the current hot water and cold water control valves and replaced them with new ones. The scope of work also included upgrading the meter, controls panels and control dampers starting in the parking garage and branching out through the Civic Center.

The upgraded controls in the Civic Center add comfort to the building's occupants, and improve the efficiency of the facility.
